QUSNOLLS Unleash the topper in you Basic Assumptions:-0) Business Entity concept? This concept explains that the Business is distinct from the proprietor. Thus, the transactions of tusiness only are to be recorded in the books of bysiness. (b) · Guing concern concept ? This concept Assumes that the business has a perpetual succession or Continued existence C.). Money measurement concept> According to this concept only those transactions which are expressed in money terms are to be recorded in accounting book. (d). Accounting period Concept > This concept requires that the life of business should be segregated into Equal parts which are termed as Accounting periods. This concept requires consistency of Accounting puriode. (c) The Account Concept > The Accord concept is based on recognition of both cash and Gredit Fransactions

9

DUSNÓLLS Unleash the topper in you Basic principles:-1) Relatization concept: -This concept speaks about recording of only those transactions which are actually relatized. @ Matching concept: -It is referre to as matching of expenses against incomes. It means that all incomes and expenses relating to the financial puriod to which the accounts Helate should be taken in to account without required to the date of receipts on payment. 3. Jule discloser concept: -As pur this concept, all significant information must be disclosed. This principle emphasizes on the materiality, objectivity and consistency of accounting data which should disclose the true and fair view of the state of affairs of a firm. (4) Duality concept:-Acc. to this concept every transaction has two aspects i.e. the benefit receiving aspects and benefit giving aspect. These two aspects are to be recorded in the books of Accounts.

5) Verifiable objective Evidence Concept:-Under the principle, according data must be Verified In other wards, documentry evidence of transactions mast be made by which are cample of Verification by an independent respect.

DUSNOLS

(d) Historical Cost Concept:-Business transactions are allocys recorded at the actual cost of which they are actually undertaken. The limitation of this concept is that the balance sheet does not show the market Value of the assests awned by the business and accordingly the owner 's equity will not reflect the real value. However, on an angoing basis, the assests are shown at their historical costs as reduced by depreciation.

D Balance sheet Equation Concept: -Under this principle; all which has been received by us must be equal to that has been given by us and needles to say that receipts are clarified as debits and giving is clarified as credits. The basic equation, appears are -DEBIT = CREDIT

* Madifying Principles: -@ The concept of Materiality:-The materiality concept refers to a situation where the financial Information of a company is considered to be material from the point of view of the preparation of the financial statements if it has the potential to alter the View on opinion of reasonable person. (D. Consistency Concept:-This concept says that the Accounting practices should not change or must remain unchanged Over a period of sevenal years. O· Conservatism Concept:-Conservatism concept states that when alternative Valuations are possible, me should select the alternative which

2DCSNOLLS Unleash the topper in you

fairly represents Boonomic Substance of transaction but when such choice is not clear select the alternative that least likely to Overstate net assests and net Income.

D. Timeliness Concept:-Under this principle, every transaction must be recorded in proper time. Normally, when the transaction is made, the same must be recorded in the proper books of accounts.

2073NÓLLS Unleash the topper in you e) Industry Practice -As that are different types of Industries, Each Industry has its own characteristics and features. There may be seasonal Industries also Every Industry follows the principles and Assumption of accounting to perform their own activities. → Qualitative Characteristics of Financial Statements -The following are all Qualitative Characteristics of financial Statements: -· Understability :-The information must be readily understandable to users to the financial statements. This means that information must be dearly presented, with additional information supplied in the Supporting foot notes to assist in clarification. · Relevance :-The information must be relevant to the needs of the users, which is the case when the information she influences the Economic decisions of users. This may involve reporting particularly relevant information, or information whose Omission or misstatement Could influence the economic decisions of users-

13

Unleash the topper in you · Reliability: -The information must be free of material engrond and bias, and not misleading. Thus, the information. should faithfully represent transactions and other events, reflect the underlying substance of events, and prudently represent Estimates and uncertainities through proper dissolve. · Comparability:-The information must be comparable to the financial information presented for other accounting periods, So that users can identify triends in the performance and financial position of the reporting Entity. 14

QUSNÓLLS Unleash the topper in you Accounting Terminologies Account a record that holds the results of financial transactions. Accountant 's Equation:-The Equation that is the basis of the Balance Sheet: Assests = Liabilities + Owners' Equity Accounting: service that Oversees, measures, and evaluates financial information for decision making purposes. Accounts payable :-Amounts due from your husiness to your Creditors Crenenally these are short term liabilities. (30-120 days), and are shown under the Current liabilities Section in the Balance Sheet. Account Receivable; -Amounts due to your business from your Customers. Bienerally these amounts are short term receivables (30-120 days) and are shown under current Assests Section in the Balance Sheet.
