Mathematical Reasoning Aptitude

1. Reasoning

What is Reasoning?

• Reasoning is the process of thinking about things in a logical, rational way. It is considered an innate human ability that has been formalized by fields such as logic, mathematics and artificial intelligence.

Types of Reasoning:

1. Deductive reasoning:

- Deductive reasoning is a method of proving a theory or hypothesis using formal logic and observations.
- Deductive reasoning starts with a hypothesis that is then supported or disproved through observations or rational thought.
- A marketing division, for example, analyses data and confirms that their company's most important demographic is young parents. They opt to give more of the marketing money to social media channels that target that category based on this information.

For example, "All men are mortal. Harold is a man. Therefore, Harold is mortal." For deductive reasoning to be sound, the hypothesis must be correct. It is assumed that the premises, "All men are mortal" and "Harold is a man" are true. Therefore, the conclusion is logical and true.

2. Inductive reasoning:

- To validate observations, inductive reasoning employs theories and assumptions.
- It's the polar opposite of deductive reasoning in that it requires deducing a general rule from a specific case or cases.
- Because it employs conclusions from observations to make generalisations, the outcomes of inductive reasoning are not always certain.
- Extrapolation, forecasts, and part-towhole arguments all benefit from inductive reasoning.

An example of inductive logic is, "The coin I pulled from the bag is a 5 Rs Coin. Again I pulled its again a coin of 5 Rs. A third coin from the bag is a 5 Rs Coin. Therefore, all the coins in the bag are 5 Rs Coin."

3. Analogical reasoning:

- Analogical reasoning is a style of reasoning that looks for similarities between two or more objects and then uses those similarities to find other properties they share.
- It is based on the brain's tendency to notice patterns and make connections.

4. Abductive reasoning:

- Abductive reasoning is a style of reasoning that reaches a logical conclusion based on an observation or group of observations.
- Abductive reasoning is similar to inductive reasoning, but it allows you to make the greatest estimates to get the simplest conclusions.
- Abduction can help with both troubleshooting and decision-making, especially when dealing with uncertainties.

For example, a person walks into their living room and finds torn up papers all over the floor. The person's dog has been alone in the room all day. The person concludes that the dog tore up the papers because it is the most likely scenario. Now, the person's sister may have brought by his niece and she may have torn up the papers, or it may have been done by the landlord, but the dog theory is the more likely conclusion.

5. Cause-and-effect reasoning:

- Cause-and-effect reasoning is a style of reasoning in which the relationship between two events is demonstrated. This logic is used to describe what might happen if a certain action is taken or why certain things happen when certain circumstances are met.
- When people draw on personal experience and a drive to improve, this form of reasoning is frequently used to guide daily decision-making.

6. Critical thinking

- Critical thinking is a process of rational thought that seeks to draw conclusions in an objective, thorough and informed manner.
- It's a product of human thought and is influenced by factors such as culture and language.
- Human thought is based on natural language that allows for a great range of ideas to be contemplated.

For example, critical thinking can be used to critique a film or book.

7. Decompositional reasoning:

- Decompositional reasoning is the process of breaking things down into their basic components in order to comprehend how each component contributes to the overall functionality of the object.
- Decompositional reasoning allows an observer to derive powerful conclusions about the total by evaluating each portion separately.

The series test series has to be studied carefully to find out whether this series is following the order/rule or not.

The questions asked under this test can be classified into the following categories.

- (a) Digit series
- (b) Alphabet series
- (c) Frequency Series of Digits/Characters

There are a few things to keep in mind while doing chain test.

- A. First try to play the whole chain.
- B. If the chain does not work, then we run it by laughing.
- C. At the very end run the alternate series

1. Digit series –

In this, a series of marks is given in the questions asked. This series is based on addition, subtraction, multiplication, division, square, square root, cube, cube root etc.

Type - (i) Finding the wrong term in the series.

In the series sequence, a wrong digit is added in place of the digit appearing at a particular place. For this, first of all it should be

known that which term is not changing according to that rule, that is the wrong term.

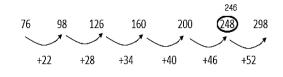

Ex.1 Which number is missing in the following number series?

76, 98, 126, 1	.60, 200, 248, 298
(.)	(5) 6 6 6

(A) 248	(B) 200
(C) 160	(D) 298

- Ans. (A)
- **Sol.** After observing the above series carefully, we find that the sixth term of the series is inappropriate

Because the number to be added to each term is 6 digits more than its first number.

So instead of 248, there will be 246.

Ex.2 Which number in the following series is such that it is inappropriate in the series?

5, 3, 6, 10, 9, 12, 17, 15, 18, 23

(A) 6 (B) 9

(C) 12 (D) 10

Ans. (D)

Sol. After observing the above series carefully, we find that the series is decreasing and increasing in the order of -2, +3, +5, -2, +3, +5

In the above series, 11 should come after the digit '6'. Hence the wrong number in the series is 10.

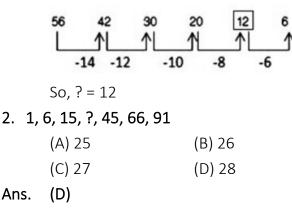

Directions: Question (1-7) Find the missing number in the following series.

1. 56, 42, 30, 20, ?, 6

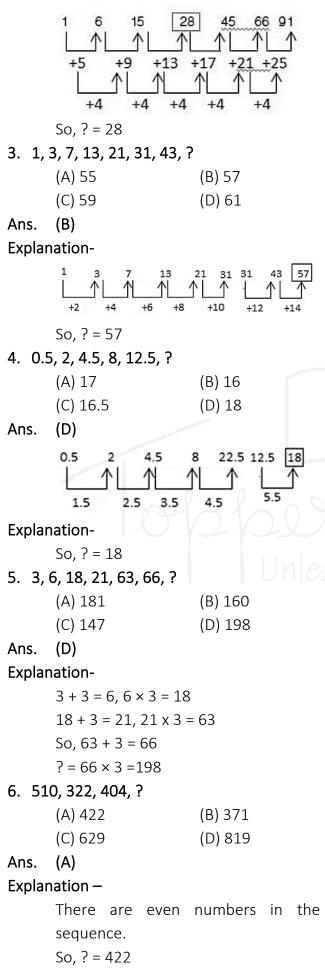

(A) 15	(B) 12
(C) 18	(D) 14

Ans. (B)

Explanation-

Explanation-

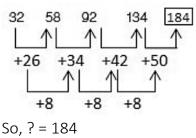

7. 32, 58, 92, 134, ?

(A) 184	(B) 194
(C) 156	(D) 169

Ans. (A)

Explanation-

Type – (II)

Completing the series -

Under this, in the given series sequence, a particular place is left blank or is denoted by the

question mark (?), then the candidates are expected to find that sequence and mark the question mark (?). Select the appropriate number to come in place of.

Ex.3 Which of the given number will come in place of question mark in the series?

16, 23, 31, 40, 50, 61, ?

Ans. (D)

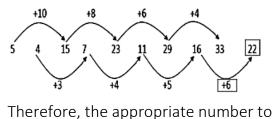

Ans.

Sol. On observing the above series, we find that the series is increasing in the order of +7,+8,+9,+10......

Therefore, the appropriate number to come in place of the question mark will be 73.

Ex.4 Which number will come in the question place in the above series? 5a 4a 15a 7a 23a 11a 29a 16a 33a g

(a) 11	(b) 22
(b) 29	(d) 34
(B)	

come in place of the question mark will be 22.

Type – III based on series rule

There are 2 types of rules of the category based on the rule of the first category.

- 1. Arithmetic series
- 2. Geometric series
- 1. Arithmetic Series An arithmetic series is called a series in which the difference of two consecutive terms is equal.

The number obtained by subtracting the preceding term from a term of an A.P. is called 'transition'.

If there is the first post of the parallel category and the post is of the post, then there will be an parallel category.

Hence the nth term of the A.P. $T_n = a + (n-d)$ (1) d (where, a is the first term and d is the transition)

Ex.5 What will be the 10th term of 1st series 3, 5, 7, 9.....

(A) 15	(B) 20
(C) 12	(D) 21

- Ans. (D)
- Sol. 10th term Tn = a + (n-1) d $T10 = 3 + (10 - 1) \times 2$ T10 = 3 + 18T10 = 21

Hence the 10th term is 21

Ex.6 If the first term of an arithmetic sequence is 5, the second term is 3 and the last term is 80, then find the number of terms.

(A) 24	(B) 23
(C) 26	(D) 29

Ans. (C)

Sol. a = 5, d = 3, Tn = 80, n = ? Tn = a + (n - 1)d 80 = 5 + (n - 1) 3 (n - 1) = 80 - 5/3 n - 1 = 25 n = 25 + 1 n = 26Hence the number of posts is 26

2. Geometric Series - Such a series in which the ratio of two consecutive terms is same is called 'Geometric Series'.

This ratio is called the 'common ratio' of the geometric series. The 'common ratio' of a geometric series is obtained by dividing a term by its previous term, i.e.

 $t2/t1 = t3/t2 = t4/t3 = \dots$

= tn/tn - 1 = proportionate

t1, t2, t3, t4

The middle term is the average of both the terms.

t2 - t1 = t3 - t2 = t4 - t3

If the first term of a geometric series is a and the proportion is r, then the nTH term of that geometric series

Tn = a. r^n−1

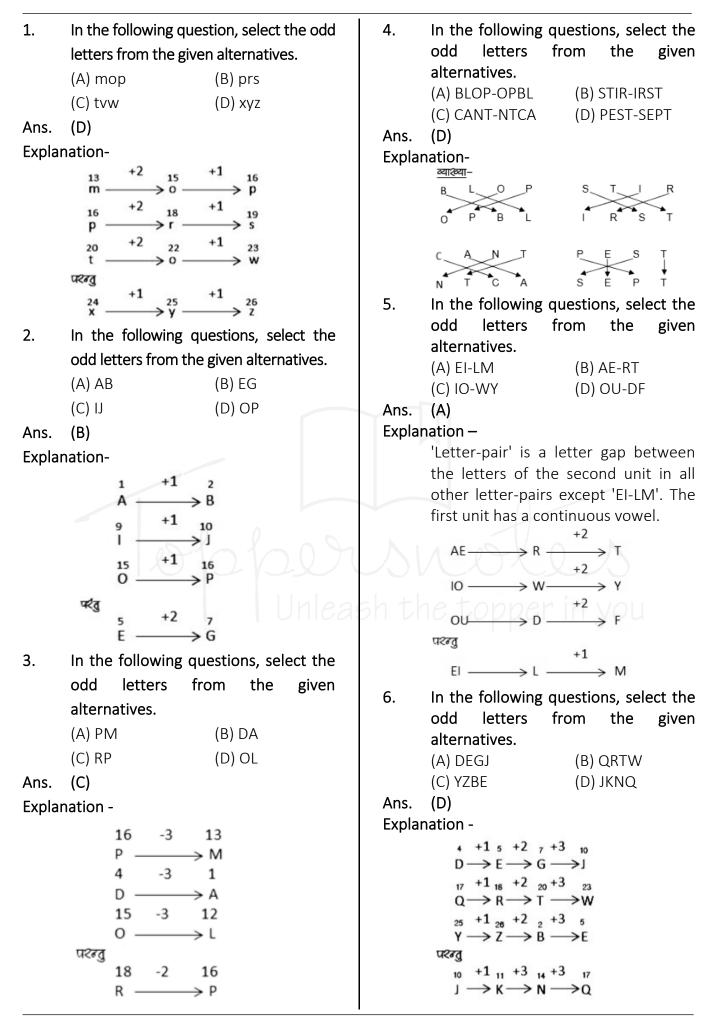

Ex.7 What is the 6th term of the series 3,9,27,81,.....?

(A) 729	(B) 243
(C) 1681	(D) 1747

Ans. (A)

Sol. First Term a = 3 Common ratio d=9/3=3 6th termT6 = a. r^n-1 = 3. $3^6 - 1$ = 3 × 3^5 = 3 × 243 = 729 = 3 × 243 = 729 So the 6th term is 729

Ex.8	What will be the 10th term of the		18 × 21= 37
	series 7, 14, 28,?		32 × 21 =65
	(A) 3216 (B) 2736		48 × 21= 97
A	(C) 2684 (D) 3584		but,
Ans.			24×2 -1=47
Sol.	First Term a=7	3.	Alphabet series -
	Common ratio=14/7=2		Under this, a series of letters related
	10th term		to the English alphabet is given in the
	$T10 = a. r^n - 1$		given series, in which one or two
	$= 7 \times 2^{10-1}$		letters are omitted, or is represented
	= 7 × 2^9		by a question mark (?) in that place.
	= 7 × 512	Ex.9	What will come in place of question
	= 3584		mark (?) in the given series?
	Hence the 10th term is 3584		JKMPT?
Туре	e-IV		(A) X (B) W
			(C) Y (D) none
1.	In the following questions, select the	Ans.	(C)
	odd number pair from the given	Sol.	
	alternatives.		10 11 13 16 20 25
	(A) 10.30 (B) 11.33		$ \begin{array}{cccccccccccccccccccccccccccccccccccc$
	(C) 50.150 (D) 13.37		+1 +2 +3 +4 +5
Ans.	(D)		Hence the appropriate letter coming
Ехріа	nation-		in place of question mark (?) will be Y.
	Except the number pair 13-37, in all	Ex 10	L7C, N9F, P12I, R16L, ? What will come
	the other number-pairs, the second		at the question mark in this series?
	number is three times the first	יע ווכ	(A) U210 (B) S21P
	number.		(C) S200 (D) T210
	$10 \times 3 = 30$	Ans.	(D) 1210
	$11 \times 3 = 33$	Sol.	Therefore, in place of the question
	$50 \times 3 = 150$	501.	mark (?), the appropriate number-
	but,		letter group will beT210.
n	$13 \times 3 - 2 = 37$	Ev 11	What will come in place of the missing
2.	In the following questions, select the		letters of the following series?
	odd number pair from the given		ab baabc aabcb abcb
	alternatives.		(A) bcaa (B) cbaa
	(A) 18 : 37 (B) 24 : 47		(C) abca (D) aacb
٨٣٩	(C) 32 : 65 (D) 48 : 97	Ans.	(B)
Ans.	(B)		(D) 12 14 16 18 20
схріа	Number pair 24: Except 47 in all other		$I \xrightarrow{+2} N \xrightarrow{+2} P \xrightarrow{+2} R \xrightarrow{+2} (T)$
	Number pair 24: Except 47, in all other		$7 \xrightarrow{+2} 9 \xrightarrow{+3} 12 \xrightarrow{+4} 16 \xrightarrow{+5} (2)$
	number-pairs, the second number is		$\begin{array}{c} C +3 \longrightarrow F \\ 3 \longrightarrow 6 \end{array} \xrightarrow{f} \begin{array}{c} +3 \longrightarrow 1 \\ 9 \longrightarrow 12 \end{array} \xrightarrow{f} \begin{array}{c} +3 \longrightarrow 0 \\ 12 \longrightarrow 15 \end{array}$
	one more than twice the first number.	l	01 21 21 2

7.	In the following questions, select the	2.	NZ, OY, PX, Q	w, rv, ?	
	odd letters from the given alternatives.		(A) FS	(B) SU	
	(A) ACDF (B) TUOP		(C) UF	(D) TU	
	(C) HIVW (D) FGKL	Ans.	(B)		
Ans.	(A)	Expla	nation-

12 + 15 = 27

13 + 14 = 27

Left to Right

to Z are called the second half.

If the letter of the English alphabet whose	Alternative Method		
opposite letter is to be found, then the corresponding number of that letter is subtracted from 27. The number obtained after subtracting is the corresponding number of the opposite letter. Finding the letter to the left and right of letters • Whatever is on our right is the right of the same letters and whatever else is on our left, is the left of those other letters. like – A B C D E F G H I J K L M On the left N O P Q R S T U V W X Y Z On the right	n th letter to the right of m th letter from left in English alphabet = $(m+n)^{th}$ letter from left. m = 16 and $n = 6(16+6)^{th} letter from left = 22^{nd} letter from left= V2. Position of letters in reverse orderExample - 2 If the English alphabet iswritten in reverse order, then which letterwill be 13^{th} to the left of the 3^{rd} letter fromthe right?(a) C (b) P(c) R (d) LAns. (b)Solution - nth letter to left of m letter fromyour right in reverse order of English$		
Question Types			
 Type-I Questions Based on Alphabet Test 1. The position of the letters in the direct sequence shall be - Example-1 Which letter is 6th to the right of the sixteenth letter from the left in the alphabet A B C D E F G H I J K L M N O P Q R S T U V W X Y Z ? (a) F (b) Q (c) U (d) V Ans. (d) Solution - As per question 	 alphabet = (m + n)th letter from right. Here, m = 3 and n = 13 = (3+13)th letter from right = 16th letter from right = P Ans. 3. Position of letters in the first half of the reverse order Under this, the first half of the letters of the English alphabet i.e. letters from A to M are written in reverse order and the remaining half of the letters are written as they are. 		
1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 A B C D E F G H I J K L M N O 16 17 18 19 20 21 22 23 24 25 26 P Q R S T U \bigvee W X Y Z f Right Sixth 16th letter from left in English alphabet = P 16th Hence 6th letter to the right of $P = V$	Example - 3If the first half of the English alphabet iswritten in reverse order, then which letterwill be to the left and seventh letter of thetenth letter from your right?(a) C(b) E(c) D(d) JAns. (c)		

The 10th letter from the right is Q and the seventh letter to the left of the letter Q is D. So required letter = D

4. Position of letters in reverse order of multiple letter segments

Example - 4

If the first four letters of the English alphabet are written in reverse order, then 5 letters also in reverse order, again 6 letters also in reverse order, 5 letters also in reverse order, again 6 letters also in reverse order, again If 7 letters are also written in reverse order and remaining letters are also written in reverse order, then which letter will be the seventh letter to the left of the eighth letter from the right?

- (a) O (b) L
- (c) N (d) M

Ans. (d)

4 3 2 1 9 8 7 6 5 15 14 D C B A I H G F E O N
13 12 11 10 22 21 20 19 $M \ L \ K \ J \ V \ U \ T \ S$ From left t 8th
18 17 16 26 25 24 23 R Q P Z Y X W

As per question,

The eighth letter from the right is S and the seventh letter to the left of the letter S is M. So required letter = M

5. Number of letters between 2 letters -Example - 5

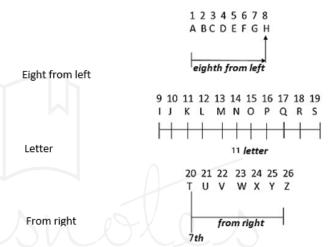

How many letters are there in the middle of the eighth letter from the left and the seventh letter from the right in the English alphabet?

(a) 8	(b) 9
(c) 10	(d) 11

(c) 10

Ans. (d)

Solution – As per Question

Hence, the eighth letter from the left is H and the seventh letter from the right is T and there are 11 letters in between these two.

6. Same position of letters when arranged alphabetically -

Example - If each letter in the word CADMP is arranged alphabetically, then the positions of how many letters will remain unchanged.

(a) 1	(b) 2
(a) 2	(a) 1

(C)	3	(d)) 4

Ans. (c)

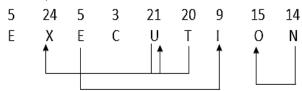

Solution

Root Word	С	А	D	М	Р
Alphabetical Order	А	С	D	м	Р
Hence such lett	ers	are D,	Μ,	and F).

ToppersNotes / 9614-828-828

Type-2 Letter- Pair Based Question

If there are as many letters between two letters of a word as there are between them in the English alphabet, then the pair thus formed between those two letters is called a letter pair.

Example - 7

How many such pairs of letters are there in the given word EXECUTION, which have as many letters between them in the word as there are between them in the English alphabet ?

(b) 2

(d) more than 3

- (a) 1
- (c) 3

(C) 3

Ans. (d)

Solution – According to question

So the required letter pair is UX, TU EI and NO i.e. 4.

Type - 3 Word Formation and Alphabet Arrangement

(i) Changing the letters of a meaningful word
 Example - 8 If the letters of the first and second, third and fourth, fifth and sixth and so on are interchanged in the words, then what will be the tenth letter when counted from its right?

(a) T	(b) N
(c) U	(d) A

Ans. (b)

Solution - The word formed by interchanging the letters of the given word COMMUNICATIONS

the right

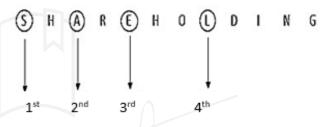

Hence, the required alphabet = N

 (ii) Making meaningful words from selected / consecutive letters of a semi-complete word

Example – 9 If anyone meaningful word can be formed from the first, third, fifth and eighth letters of the word SHARE HOLDING, then what will be its second letter? If no such word can be formed, give the answer 'X' and if more than one word can be formed, give the answer 'Y

Ans. (e)

Solution - The word given according to the question,

New word SEAL = SALE, SEAL = 2 Meaningful word Two meaningful words formed from it are SALE and SEAL, so option Y will be correct.

Example – 10 How many meaningful words with four or more letters can be formed from the letters of the word DIALOGUE ?

(a) 5 (b) 7 (c) 9 (d) 8 **Ans.** (c)

Solution - words with four or more letters can be formed from the letters of DIALOGUE.

For Example -

DIAL, GOAL, GOAD, GILD, GLUE, GUILD, LOUD, GUIDE, GUILE etc.

(iii) Arrange the following numbers of different letters in such a way that a meaningful word is formed.

Example - 11

Arrange the numbers of different letters given below in such a way that a meaningful word is formed.

G	Т	А	Е	Ν	Μ	
1	2	3	4	5	6	
(a) 1, 3, 2, 6, 4, 5			(b) 6, 3, 5, 1, 4, 2			
(c) 1, 3, 2, 5, 4, 6			(d) 6 <i>,</i>	3,1,	5, 4, 2	
Ans.	(d)					

Solution - On arranging the given letters in a meaningful order, the word MAGNET is formed which is obtained by arranging the numbers in the order 6, 3, 1, 5, 4, 2.

Type - 4 Letter Group Based Questions

Under this, some groups of three or four letters are given in the questions asked. The answer is to be found by arranging these letter groups according to the instructions given in the question.

Example – 12

If the letter S is put before them in all the given words, then how many words in the new arrangement will make meaningful English words?

(a) Only SHE

- (b) ANT and JUG
- (c) Only OLD
- (d) TIN and JUG
- (e) Only TIN

Ans. (c)

Solution - The following is the word in the new arrangement.

SHE, SOLD, SANT, STIN, SJUG

Hence in the given words, the letter S is preceded by only one meaningful word SOLD.

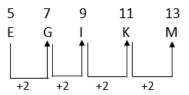

TYPE-5 RULE BASED ON INSTRUCTION

In this type of questions, related to English alphabets are given. Following these rules, it is to be seen that in which option the given letter is following the group.

Example - 13 A letter is missing between two letters.

(a) EGIKM	(b) MOQTU
(c) MPQTU	(d) MNOPQ
Ans. (a)	

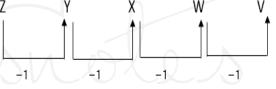

Solution -

So in the EGIKM letter-pair, one letter is missed between every two letters.

Example - 14 English letters are in the reverse order of the alphabet.

(a) ABCDE	(b) ZY	XWV
(c) KLMNO	(d) PC	QRST
Ans . (b)		
Solution		
Z Y	X	W
1 A .		A .

Hence, the letter pair Z Y X W V is in the opposite order of the alphabet.

Example with Solution

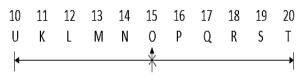

1. Which letter is exactly between the letters J and T in the English alphabet?

(a) N	(b) O
(c) P	(d) Q

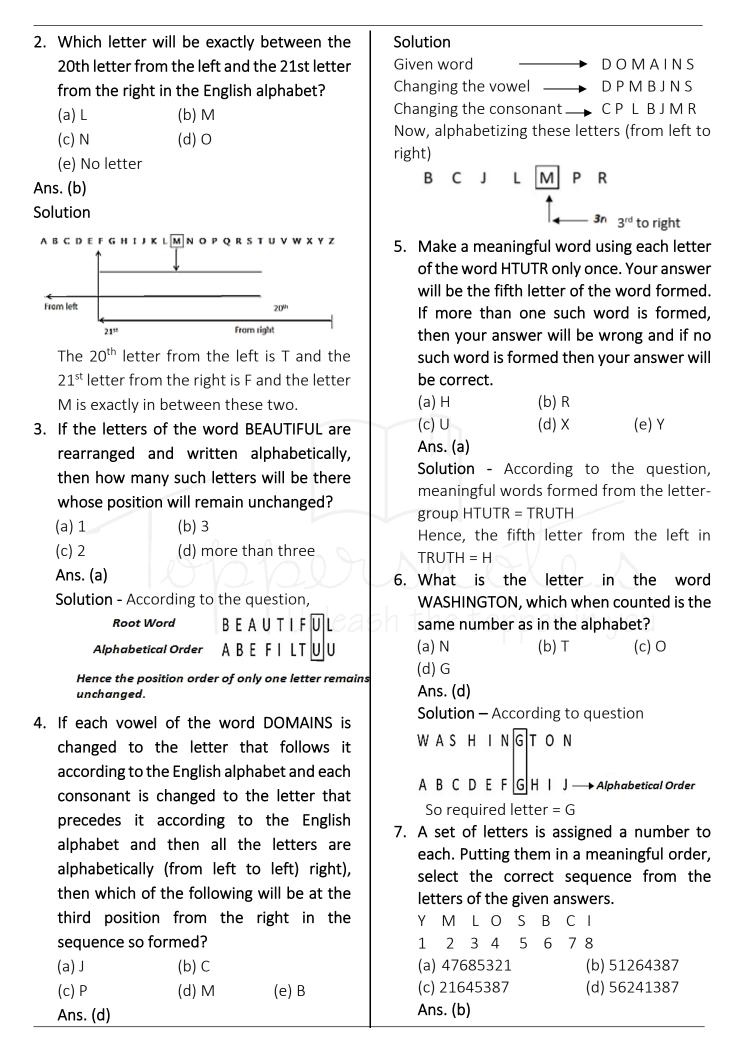

(e) None of the letter

Ans. (b)

Solution

The letter O is exactly between J and T.

Solution - By rearranging the letters of Y M L O S B C I, the word S Y M B O L I C will	Practice Questions			
be formed. So the correct order is 5 1 2 6	TYPE – 1			
4387.	Q.1 Cannot be formed using the letters			
8. In the following question, a word is given	the given word.			
followed by four alternatives. Out of the	VENTURE			
four alternatives, only one option can be	(a) RENT (b) RATE			
made from the letters of the given root word. Select that option.	(c) TURN (d) TRUE			
VENTURESOME	Q. 2 IMPOSSIONABLE			
(a) ROSTRUM (b) TRAVERSER	(a) IMPOSSIBLE (b) POSSIBLE			
(c) SERMON (d) SEVENTEEN	(c) IMPOSE (d) IMPASSIVE			
Ans. (c)	Q. 3 KOLMOGROV - SMIRNOV			
Solution - The word SERMON can be	(a) MOORINGS (b) ROOMKIN			
formed from the letters of the given word.	(c) GOVINDA (d) SLIMGROON			
9. Which letter can be put after the words of the following questions to form new	Q. 4 DISINTEGRATION			
words?	(a) SIGNATURE (b) INTERN			
STAG, ENGAG, DAMAG, SEWAG	(c) SINGER (d) RATION			
(a) A (b) S				
(c) E (d) P				
Ans. (c)	(a) TOTEM (b) POETIC			
Solution - If the letter E is placed	(c) COMPOSE (d) OPINE			
immediately after the words STAG, ENGAM, DAMAG, SEWAG, then	Q. 6 TERRORISM			
completely new meaningful words	(a) MIRROR (b) ERROR			
STAGE, ENGAGE, DAMAGE, SEWAGE will	(c) MORE (d) ROAR			
be formed.	Q.7 COMMUNICATION			
10. The number of letters skipped between	(a) ACTION (b) UNION			
two adjacent letters is increased by	(c) NATION (d) UNISON			
multiples of two.	Q.8 TRANSLATION			
(a) ADIPY (b) JMRYG (c) EHNTC (d) HKBWF	(a) TRANSIT (b) TRANSMIT			
Ans. (a)	(c) RATION (d) NATION			
Solution - The rule given in series A is being	Q.9 TECHNOLOGICAL			
followed.	(a) LOGIC (b) LOAN			
1 4 9 16 25	(c) HATER (d) COLOGNE			
	Q. 10 EXAMINATION			
	(a) MINE (b) TIME			
B,C E,F,G,H J,K,M,N,O Q,R,S,T,U,V,W,X	(c) SAME (d) NOTE			
+3 +5 +7 +9 So, the desired series = ADIP
